DETAILED ACTION

1. The terminal disclaimer filed on 6/20/2005 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of US 6,720,048 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Claim Rejections - 35 USC § 102

2. Claims 6 and 7 are rejected under 35 U.S.C. 102(e) as being anticipated by Promel et al. (US 6,225,421).

The reference discloses in Example 10 a pipe made from ethylene/hexene copolymer wherein the pipe has ESCR > 3600 hr. ESCR is stated at col. 7, lines 34-42 to correspond to ISO 13479. The reference measurement appears to generally correspond to applicants' 20% notch measurement, but does not report the 40% notch value. Simple insertion of the minimum reference value of 3600 hr into applicants' estimated relationship (see formula (a) of remarks filed 6/20/2005) yields an estimated 40% notch value of 140 hr for the reference example, and therefore meets all limitations of claim 6. However, there is reasonable basis to conclude that the reference example also meets the higher 40% notch value of claim 7 for the following reasons: (a) the reference reports that the 20% notch value is greater than 3600, and therefore the actual 20% notch value exceeds 3600 hr by an unspecified amount; (b) applicants' formula is clearly a rough estimate, as seen by applicants' Example 1 showing a pipe

Art Unit: 1713

having 20% notch breaking time of 3220 hr (lower than the reference value of >3600 hr) yet the 40% notch pipe had a breaking time of 160 hr; and (c) the reference method has conducted the test at a slightly greater pressure (4.6 MPa rather than 4.54 MPa as reported by applicants). Accordingly, the reference example appears to inherently contain the 40% notch value required in claim 7. The burden of proof is shifted to applicants to show that reference example does not contain all claimed limitations.

Conclusion

3. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
